

Potter Valley Project / Huffman Ad Hoc Committee Water Supply Working Group

Working Draft

Water Supply Objectives

Discussed at Water Supply Work Group Meeting in May and July and Ad Hoc in May

Objectives

- Address water supply needs and demands across both basins
- Consider future hydrographs
- Articulate existing constraints (costs)
- Maximize benefits of coordinating operations, timing, and flow regimes along with biological considerations for timing, quality, and temperature
- Evaluate a small number potential scenarios that consider fish passage to inform Ad Hoc decision making.

Note: The Working Group would like to consider options beyond existing regulatory, legal, and physical constraints to explore scenarios, including dam removal, but the existing models will not support this work.
